Subject: **Domestic Violence Restraining Order System Implementation of NCIC 2000**	No. 05-08-BCIA Date: 03/19/05	Contact for information: Peggy Kelly Automated Systems Program (916) 227-6876

TO: ALL CLETS/CJIS USERS

This information bulletin is to announce that the Domestic Violence Restraining Order System (DVROS), a California Department of Justice (DOJ) Criminal Justice Information System (CJIS) data base, has implemented the new National Crime Information Center (NCIC) 2000 data field codes and formats. The new CJIS/NCIC 2000 formats are now available for use by California law enforcement and criminal justice agencies. For a period of 12 months, both the old and new CJIS/NCIC 2000 codes will be available to allow law enforcement sufficient time to complete system programming changes to accommodate the NCIC 2000 record formats.

NCIC 2000 is replacing the current NCIC system managed by the Federal Bureau of Investigation. NCIC 2000 has the same mission and basic functionality as the current system but includes technological improvements that will provide a better tool for enhancing, storing and retrieving information used for identification and fighting crime.

California Law Enforcement Telecommunication System (CLETS) programming changes are required at the computer system server level (e.g., MSC, CAD LAN/WAN). Programming changes are identified on the assumption that all computer system servers act as pass-through for incoming messages. The Consolidated Data Dictionary (CDD) outlines programming changes affecting all CLETS users and can be used to assist in the implementation of NCIC 2000 requirements. The CDD is available on line to agencies subscribing to the California Law Enforcement Web (CLEW) and to those agencies supported by the DOJ law enforcement agency intranet website, LEAWEB.

Attached is a brief description of the DVROS changes pertaining to the new CJIS/NCIC 2000 data field codes and formats.

The DOJ has already implemented the NCIC 2000 requirements for the Automated Property System (APS), the Missing and Unidentified Persons Systems (MUPS), the Automated Firearms System (AFS), and the Wanted Persons Systems (WPS). The DOJ will continue to phase the production implementation of the remaining data bases, the Stolen Vehicle System (SVS) and the Supervised Release File (SRF), with the NCIC 2000 requirements in the near future. All CJIS/NCIC users will be notified as each data base is released to the production environment.

If you have questions or would like to request a copy of the CDD, please contact Peggy Kelly, Field Representative, Domestic Violence Restraining Order Unit at (916) 227-6876, or via e-mail at peggy.kelly@doj.ca.gov.

Sincerely,

DOUG SMITH, Deputy Director
Division of California Justice Information Services

For   BILL LOCKYER
Attorney General

Domestic Violence Restraining Order System (DVROS)
Implementation of NCIC 2000

The following changes have been made to the DVROS:

Data Field Code	Data Field Name	Change
AKA	Alias	Expanded field length.
CMC	Caution Code	Replaces CAU. Expanded field length and codes. Provides enhanced codes of potential dangers associated with a subject. Only 9 occurrences may be entered. The CAU code M (Mentally Disturbed) is no longer available. If a record was entered with a CAU of M, "Other" will now be displayed in the record and a notation in the MIS field should be made.
ENS	Expanded Name Search	New inquiry flag to allow for wider NCIC name search. Can only be used on a direct NCIC inquiry transaction.
LIC	Vehicle License Plate Number	Expanded field length.
LIG	Vehicle License Group	Expanded field length.
NAM	Name	Expanded field length.
NOA	Notify Originating Agency	New flag entered by originating agency requesting to be notified by NCIC of all hits. The NOA field will not be displayed in the record.
OCA	Originating Case Agency Number	Expanded field length.
OLN	Operator License Number	Expanded field length.
PPN	Protected Person Name	Expanded field length.
RSH	Related Search Hit	New flag to request related hits with same ORI and OCA be included in response. Can only be used on a direct NCIC inquiry transaction.
SMT	Scars, Marks & Tattoos	Expanded field length.

SRB   Served By   Expanded field length.

STY   Stay Away   Added V (Protected Persons Vehicle) to code choices. The following codes are now accepted in the STY field: P (Protected Person), R (Residence), W (Work Place), C (Child's School or Daycare), V (Protected Person Vehicle), and A (All of the Above). The STY field will accept one to four of the following codes: P, R, W, C or V.

      As of November 3, 2004, when "A" is input into the STY field the following will display: Protected Person, Residence, Work Place, Child's School or Daycare, and Protected Person Vehicle. Records entered prior to this date with an "A" in the STY field, the following will display: Protected Person, Residence, Work Place and Child's School or Daycare.

VLD   Date of Last Validation   New field that is computer generated during on-line validation.

VLN   Name of Validator   New field for person certifying the validation of the record.
